environmental education

Rethink, Refuse

Work done by
students from year 5 and year 7

Memória Justificativa

This project aimed to alerting the school community to the 5R's policy.

As the Art was present as a key player in this project, it has become a vehicle of communication for this subject.

The multiple school subjects have been raising students' awareness for this global problem becoming easier to address the issue and to develop the project.

The students were challenged to build a cardboard box facility and were given complete freedom to organize the boxes in whatever position they preferred.

The photos show the project progress from the time we received the boxes to the adjustments made by the students to have the final version of the work of art.

Preparing the card boxes

(the boxes used were collected from school neighborhood supermarkets)

Preparing stripes from used fabric

Creativity and freedom
while organizing the boxes

Activity inspired by the work of the artist Lourdes Castro.

Lourdes Castro was born on December 9, 1930, in Funchal, Madeira.

The natural landscape of the Island that surrounded her since she was a child, and for which she chose to return since 1983, is a passion that will accompany her life and consequently her work, see, for example, the series “The Great Shadow Herbarium (1972).
